Most nutrition experts today would recommend a balanced diet containing elements of all foods, largely because of our need for sufficient Vitamins. Vitamins were first called 'accessory food factors' since it was discovered, in 1906, that most food contain, besides carbohydrates, fats, minerals and water, these other substances necessary for health. The most common deficiencies in Western diets today are those of Vitamins. The answer is variety in food. A well-balanced diet having sufficient amounts of milk, fruit, vegetables, eggs and meat, fish or fowl (i.e. any good protein source) usually provides adequate minimum daily requirements of all the Vitamins. 3
