5

OR

ii) Write a letter placing an order for the supply of some glass equipment to National scientific Co, Cement Road, Nagpur. Write a complaint letter for the same for receiving damaged consignment.

B) Read the following passage carefully and answer the questions below:

5

POLLUTION

Recently a survey of air pollution was conducted by a student of university of Pune, P.N. Rao under the guidance of Dr. Alka Gadgil. Their statistics of lead levels are four times the normally tolerable limit which is really alarming.

Read danger of air pollution lead poisoning which causes pulmonary diseases like T.B. Emphysema and bronchial cancer has never been appreciated by environmentalist. compared to lead poisoning the pollution caused by other vehicle exhausts is microscopic and can be controlled mostly by proper engine tuning. Leaded petrol is the real culprit and the remedy is immediate introduction of lead free petrol. This appears to be distant prospect at present.

The traffic police and municipal authorities can do much to alleviate the present dangers of lead poisoning which is primary caused by traffic bottlenecks.

Ironically it is seen that when the traffic lights are not working the vehicles move very swiftly without engine idling. If the static running of the vehicle engines is reduced, lead levels will automatically be brought under control presumably, the traffic lights are not properly located or their times required recalibration.

- i) Who conducted the survey of air pollution?
- ii) What is the real danger of air pollution?
- iii) How can traffic police and the Municipal authorities help to decrease pollution?
- iv) What can be noticed when the traffic signals are not working?
- v) Make sentences with any two of the following words so as to bring out their meaning:
 - a) Tolerable
 - b) Culprit
 - c) Alleviate
 - d) Automatic
